

Chronic Pain Elimination

A Guide To Neuro-Reboot

"When All Else Fails, This is the Reason Why."

Chronic pain of many types, including lower back and neck pain, headaches, fibromyalgia, and many types of unresolved nerve, joint and muscle pain **requires** fixing or resetting the of autonomic (or "automatic") nervous system in order to be permanently eliminated. If you have pain lasting 3 months or 30 years, then this area of your body needs treatment. It makes no difference how long you have had your pain or how much pain you have. The impact that our central de-sensitization treatment (**Neuro-Reboot**) will have on your pain will completely amaze you. This is the treatment that our patients are simply calling "a miracle."

Why does it work so well when so many other treatments have failed?

**Until now, the brain, where all pain messages originate,
has completely been ignored and left untreated!!**

Neuro-Reboot is a one-of-a-kind treatment designed to treat your "automatic" nervous system from top to bottom. The control center for this system is in the lower part of your brain called your brain stem or first brain. **Neuro-Reboot** influences this part of your nervous system through all 3 levels of your brain, including both conscious and unconscious. It is the ultimate and most complete treatment available for controlling the automatic commands being sent by way of the electrical (vibrating) energy impulses along your nerves. **You will be surprised at how your "automatic" nervous system is holding onto your pain.** **Neuro-Reboot** is a powerful, but gentle, non-invasive treatment system that produces consistent, remarkable results with the following problems:

- Chronic Pain
- Post- Surgical Pain
- Neck Pain
- Low Back Pain
- Radicular Arm Or Leg Pain
- Unexplained Pain
- Fibromyalgia
- Headaches/Migraines
- Nerve/Muscle Pain
- Whiplash
- Joint Pain
- Disc Related Pain
- Numbness/Tingling/Ringing

Many people know they have chronic pain, because their pain is throughout their body, with a different area intensified each week. This has been the story of their life for many months or even years. These people are ideal for this treatment.

However, there are many people with a diagnosis of arthritis, bursitis, tendonitis, stenosis, pinched nerves, and disc herniation that don't even realize that their chronic pain is beyond biomechanical/ structural influences. At this point, it is primarily controlled by the autonomic nervous system. The original injury out in the body has healed and left these tiresome, nagging symptoms behind. They cannot determine the source of the pain because **pain from the autonomic nervous system feels exactly like pain caused from a damaged structure in their body.**

During an evaluation, we examine both the biomechanical structures and the autonomic nervous system to determine all of the contributing factors to your pain. We then, begin treating the largest contributor to your pain and watch as the pain signals are shut-off and the pain disappears! Whether you would like to feel better quickly or just find someone who can finally help you feel better, this complete approach drastically improves your chances for success.

We fix pain every day in our clinic. Our clients are surprised at how this different, very simple approach, actually makes their symptoms disappear. Please call us to schedule your evaluation or to ask any questions that you may have. We personally guarantee that we will know if we can help you within three sessions.

You have nothing to lose, except the pain!
